HEATSAIL®

UNIQUE OUTDOOR LIGHTING & HEATING

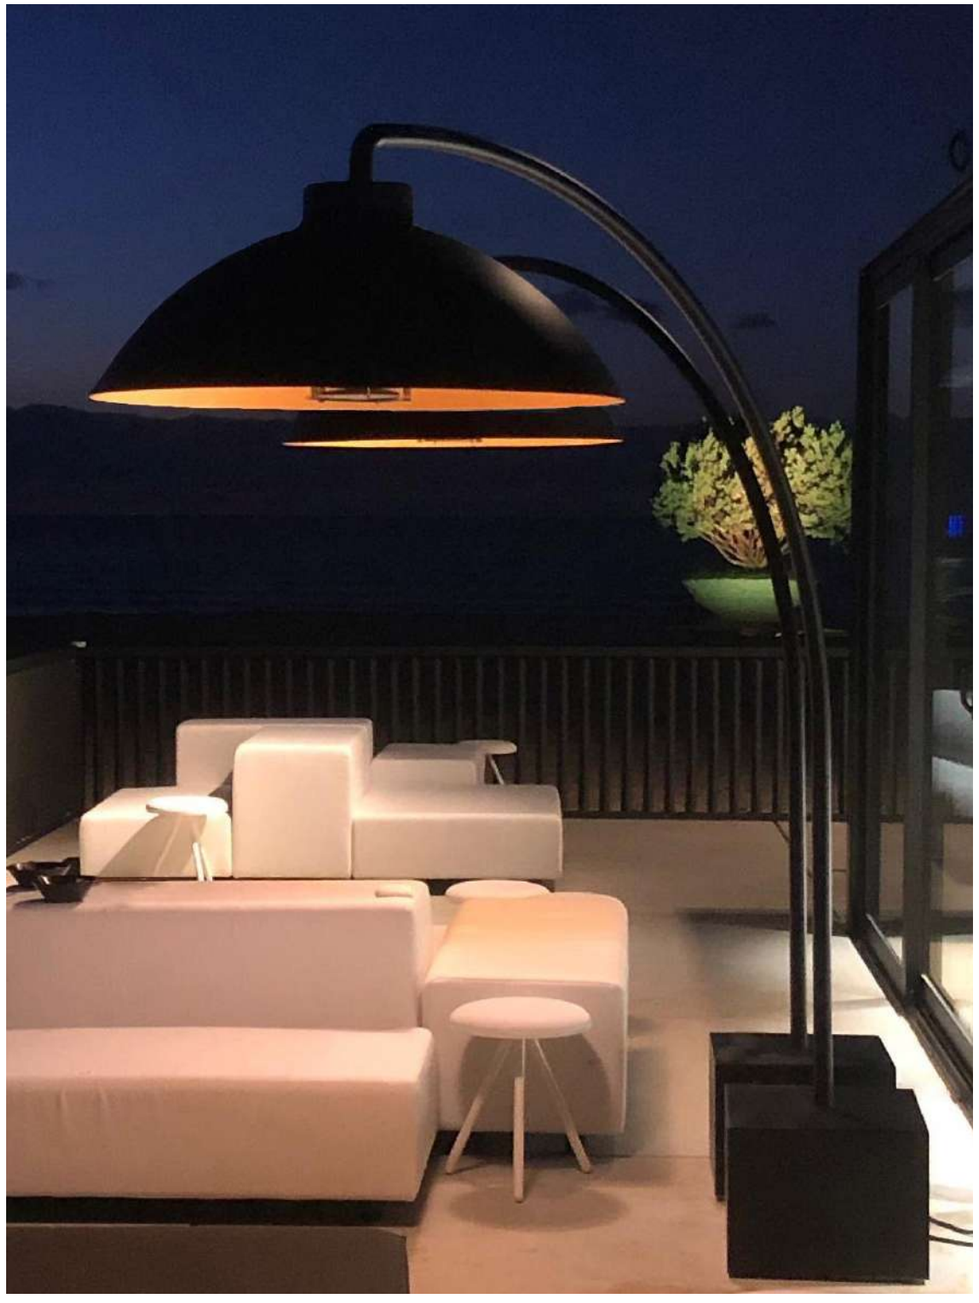
No better background scenery for a nice long conversation than a sultry summer night.

Why don't we just make it a
little warmer and lighter outside,
so those summer nights can last forever...

HEATSAIL PRODUCTS ARE DESIGNED AND MADE IN BELGIUM

HEATSAIL

Heatsail is a Belgian design company established in 2012 that has redefined the luxury lighting, heating and cooling space. We develop unique technical outdoor products to create longlasting experiences by extending the finest moments of a beautiful day.



DOME

TIMELESS
LIGHTING AND HEATING
FOR YOUR TERRACE

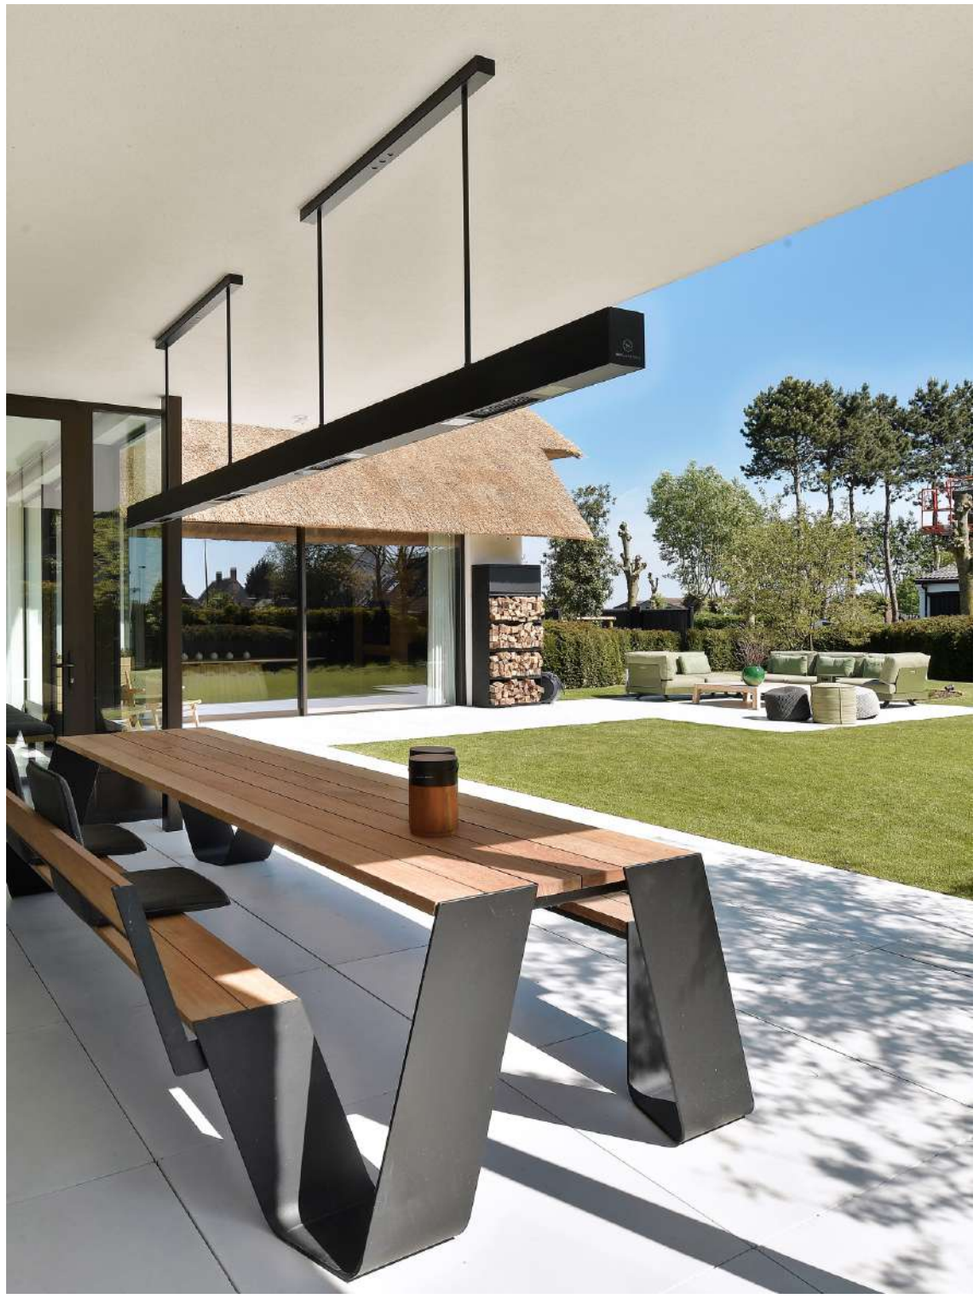
LIGHT

When it gets darker you turn on the light. You can easily dim the light with the remote control. The light can be used with or without the heating.

HEAT

When it gets chilly just turn on the integrated heating. Discrete far-infrared heating elements give you the most pleasant warmth. Control your surrounding temperature with our 2 heat settings, low and high for all those cosy spring or autumn days and nights.

HEATSAIL



BEEM

LIGHT

When it gets darker you turn on the light. 6 or 8 lightpoints distributed over the length of the BEEM give you plenty of light.

HEAT

When it gets chilly just turn on the integrated heating. Discrete far-infrared heating elements give you the most pleasant warmth. They are evenly distributed over the length of the BEEM, creating equal warmth for everyone. There are two heat levels to support your needs.

COOL

When it gets really too hot, switch on the optional misting. Integrated channels on both sides of the BEEM create a fine mist. A combination of very small orifices and high pressure lets water evaporate in the air before it makes your hair frizz. It cools the surrounding air up to 15°C. Do you want to have control on how and when? Use the smartphone app and you are the cooling master.

DISC

TIMELESS
LIGHTING AND HEATING
BY PIET BOON

LIGHT

When it gets darker you turn on the light. You can easily dim the light with the remote control. The light can be used with or without the heating.

HEAT

When it gets chilly just turn on the integrated heating. Discrete far-infrared heating elements give you the most pleasant warmth. Control your surrounding temperature with our 2 heat settings, low and high for all those cosy spring or autumn days and nights.

HEATSAIL

HEATSAIL

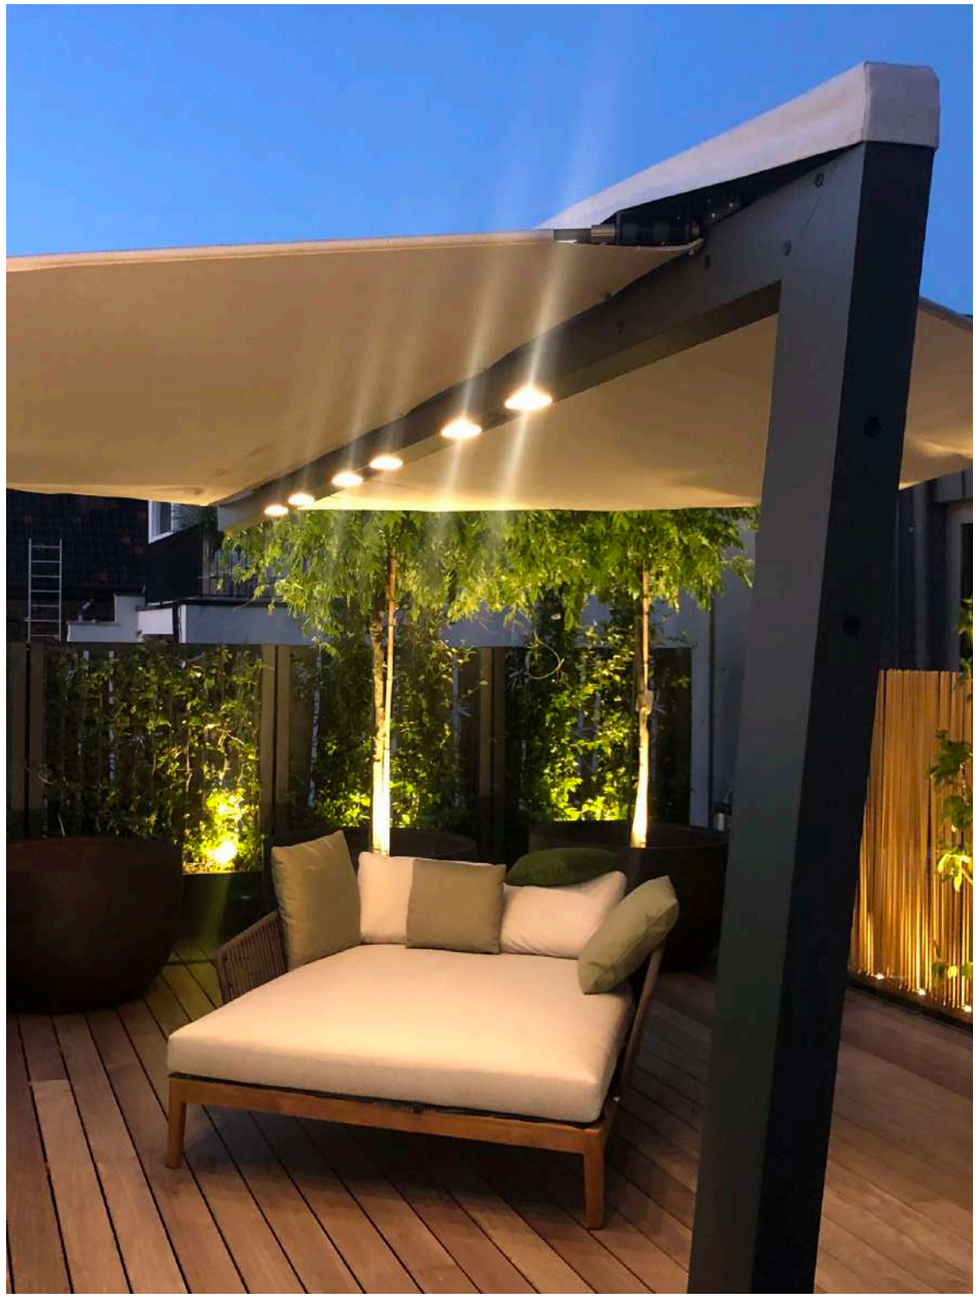
GLOW

GLOW consists of sets of 3 or 5 pieces.

Suspend each piece separately, or opt for one of the optional ceiling modules to suspend them in a circle or in a line.

You can also opt for a control box with which you can dim the lights using a remote control and switch the heating on.

HEATSAIL



LEAF

UNIQUE SHADE SOLUTION

The outdoor room has a tranquility unlike any other.
A comfortable, inviting space with fresh air and a scenic view. The essential element of the outdoor room, however, is shade. The number one reason people choose to avoid their outdoor room is lack of shelter from heat and rain.

Providing needed shade is what our LEAF does best – supplying protection from the elements, it heats, cools and enlights with undeniable style. The elegant LEAF-shaped design of this future-proof solution allows it to blend harmoniously into its surroundings.
