Sustainability: Building a greener tomorrow.

At Kettal, we are committed to more than just creating exquisite outdoor furniture and designs. We are dedicated to shaping a sustainable future where beauty and nature coexist harmoniously. Our journey towards sustainability is rooted in a deep respect for the environment and a passion for innovation.

In an era where the preservation of our planet is of utmost importance, Kettal is taking meaningful steps towards reducing our carbon footprint, conserving natural resources, and minimizing waste. Our sustainable practices extend from the selection of eco-friendly materials to energy-efficient manufacturing processes, all while maintaining our unwavering commitment to craftsmanship and design excellence.

Join us in exploring the world of Kettal Sustainability, where style meets eco-consciousness. Discover how we blend creativity with responsibility, striving to inspire a lifestyle that not only enhances outdoor spaces but also safeguards the planet for generations to come. Together, we can forge a greener tomorrow, one design at a time.

We monitor the life cycle of our products.

Materials

Materials are an important part of caring for the environment and a key factor in the product life cycle. All materials are recyclable and recycled as much as possible, as long as they have the characteristics to ensure durability. The better the quality, the longer the product life cycle. And a longer life cycle means it is more environmentally friendly, as fewer manufacturing processes will have to be put in place, reducing the carbon footprint and generating less waste.

Our raw materials are not only recyclable, but recycled. We study the impact of the material recovery process and the durability of the material over time.
The essential raw materials are produced locally, within a radius of 100km.
We have analysed each product life cycle to minimize environmental impact as far as possible. Not only raw materials, but other variables such as CO^2 emissions from transport or use and durability.

Materials

Aluminium	85% Recycled	100% recyclable	Carbon emissons: 6,99kg CO2 eq/kg Durability average: 30 years
Terrain Coatings	0% Recycled	0% recyclable	Carbon emissions: 0,88 kg co2 eq/kg Durability average: 20 years
Relate fabrics	10% Recycled	100% recyclable	Carbon emissions: 0,321 kg co2 eq/kg Durability average: 15 years
Glass	20% Recycled	100% recyclable	Carbon emissions: 0,79 kg co2 eq/kg Durability average: 30 years
Stainless Steel	70% Recycled	100% recyclable	Carbon emissions: 4,55 kg co2 eq/kg Durability average: 20 years
Bela Ropes and Stripes	50% Recycled	100% recyclable	Carbon emissions: 2,21 kg co2 eq/kg Durability average: 15 years
Terrain Elements Fabrics	10% Recycled	100% recyclable	Carbon emissions: 3,81kg co2 eq/kg Durability average: 15 years
Parallel	60% Recycled	100% recyclable	Carbon emissions: 2,72 kg co2 eq/kg Durability average: 20 years
Ceramic	0% Recycled	85% recyclable	Carbon emissions: 0,67 kg co2 eq/kg Durability average: 30 years

Key values

We do not build in obsolescence.

Fluorocarbon-free Fabrics

Creation of Terrain Fabrics, first fabric finished with a fluorocarbon-free compound, which is the ideal way to achieve wearing comfort and protect the material in an environmentally friendly way. Since then, all our fabrics are fuorocarbon-free.

FSC Wood

All wood used in our furniture is FSC certified, ensuring its sustainable origin and responsible management. The wood used in our furniture has been sourced from well-managed forests, supporting the conservation of natural habitats and the livelihoods of local communities.

Goal: Zero emissions

At Kettal, our goal is to achieve zero emissions by 2036. We are committed to minimizing our environmental impact and actively working towards a sustainable future. Through innovative practices, energy-efficient technologies, and responsible manufacturing processes, we aim to eliminate greenhouse gas emissions from our operations entirely. We understand the urgency of addressing climate change, and reaching this ambitious target is an essential step in creating a better world for future generations.

Pavilions

Our Pavilions are made with 85% Recycled materials.

Carbon footprint

Since the past year, we have been analyzing the carbon footprint of each of our products. In our commitment to sustainability, we believe it is essential to understand and reduce the environmental impact of our manufacturing processes. By examining the carbon footprint, we aim to identify areas where improvements can be made, such as optimizing energy consumption, reducing emissions, and implementing eco-friendly materials. This ongoing analysis allows us to make informed decisions and work towards creating more environmentally-conscious products for our customers.

Environmental-certified materials

Our materials are backed by environmental certifications. These certifications ensure that the materials we use in our products have been sourced and processed in an eco-friendly and sustainable manner. We are committed to upholding these environmental standards and continuously seeking ways to minimize our ecological footprint.

CFC-free polyurethane

The polyurethane we use is CFC-free. CFC stands for chlorofluorocarbon, which is a harmful substance known for its ozone-depleting properties.
By opting for CFC-free polyurethane, we ensure that our products contribute to a healthier planet by reducing the release of harmful substances into the atmosphere. We believe in creating sustainable and responsible designs, and this commitment extends to the materials we choose.

Paint almost 100% recyclable

Almost 100% of the paint we use is recyclable and environmentally friendly. The main supplier of paint used in the manufacture of furniture has both quality certifications (Qualicoat, GSB, IKS, Quali Steel Coat) and environmental certifications for its products (verified by AENOR in accordance with its Global EPD type III ecolabel system, ISO standards, etc.).

Architecture

Bringing order, form and structure.

Kettal pavilions seek to bring order, form and structure to outdoor areas. Functionally, they are designed to provide shelter: to shade and cool or protect from the wind and rain.

Pavilion V, by Vincent Van Duysen

The V Pavilion project is based on the idea of creating a dialogue between different environments: the interior and exterior of architecture.
The gentle connection between people and the environment through constructive elements, a free floor and the importance of light.
The pavilion is designed to be subtly linked to the main building and the outdoor area at the same time.

V Pavilion is inspired by 1950s American modernism, which summarised a more industrial trend of thought based on new and innovative building technologies and on Functionalism, emphasising open-plan, multifunctional spaces that are flexible and easily adapted and modified for any lifestyle or environment.

The open areas between the columns can be assembled with various facings: glass, louvers to adjust the light, curtains, solid stoneware panels, cupboards, cooker, fireplace... to furnish a space that is customised to the client's specifications.

Technology

The Pavilion V, by Vincent Van Duysen, offers an unprecedented level of control through its innovative interface options. Users can effortlessly manage the pavilion's features using conventional switches conveniently located throughout the structure. Alternatively, the cutting-edge Kode app, developed by Kettal, revolutionizes the user experience. Available for both iOS and Android devices, Kode empowers users to govern the pavilion's lighting independently and adjust the bioclimatic ceiling—all with a simple tap on their smartphone or tablet. The fireplace, however, is regulated with a separate remote control. Furthermore, the flexibility extends to the pavilion's infrastructure, as waterproof outlets can be seamlessly integrated into the columns, enhancing convenience and functionality. With such intuitive control mechanisms, the Pavilion V epitomizes sophistication and technological advancement, elevating the standards of contemporary living.

Living 2025

VDL Penthouse, by Richard Neutra

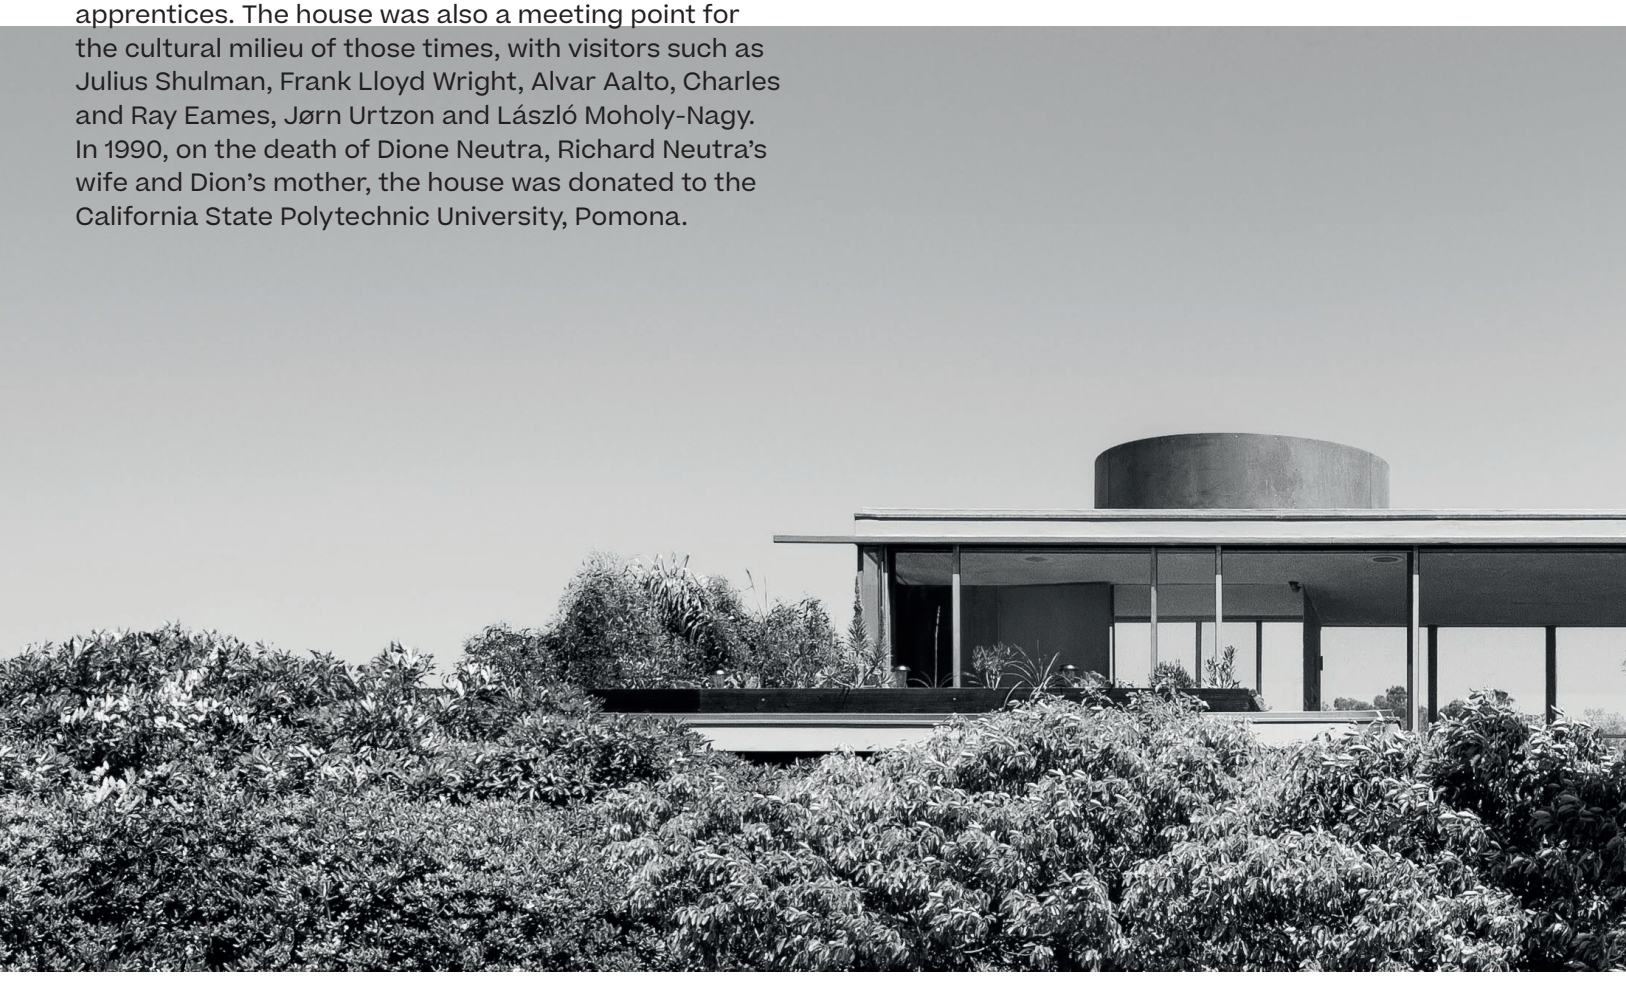

In 1932, Richard Neutra built his house thanks to a donation from the Dutch philanthropist Dr Van Der Leeuw (hence the acronym VDL). This house is a particularly important example of Richard Neutra's work because it encapsulates all the architectural theories that he first posited in his book Wie Baut amerika?, 1927 and later on in his more philosophical reflections Survival Through Design, 1953.
Seven years later, when the family had grown, he built an annex in the garden. In 1963, the house was devastated by fire, leaving only the annex standing. At that time, Richard Neutra and his son and colleague Dion Neutra rebuilt the house and added a solarium/ atrium on top of the original structure. He incorporated everything he had learned over the years in this reconstruction: modularity, natural climate control, water roofs, interaction with the natural environment, technological advances, etc.
Apart from being his home, the VDL Research House was also his office. In this building, over 30 years, he designed hundreds of international projects. Some of the most representative architects from the Modern American movement also spent time in his practice as apprentices. The house was also a meeting point for the cultural milieu of those times, with visitors such as Julius Shulman, Frank Lloyd Wright, Alvar Aalto, Charles and Ray Eames, Jørn Urtzon and László Moholy-Nagy.
In 1990, on the death of Dione Neutra, Richard Neutra's wife and Dion's mother, the house was donated to the California State Polytechnic University, Pomona.

Pavilion H

Experience the ultimate in outdoor living with the Outdoor Pavilion H - the fully configurable pergola that's taking the market by storm. With a range of new components that are sure to impress, including a new bioclimatic roof with cutting-edge technology and a sleek, redesigned shape, a waterproof aluminum roof, a polycarbonate roof, new canopies with slats, stylish louvers, new aluwood carpentry, and a glazed side, this pavilion is the perfect way to create a customized outdoor oasis that's uniquely yours.
But that's not all - the Outdoor H Pavilion is now smart home compatible, which means you can control everything from the lights to the fan with the Kode app. And with the ability to configure your pavilion to your exact specifications, you can create the perfect outdoor space for relaxing, entertaining, or anything in between.

Whether you're looking to create an intimate outdoor retreat or a spacious entertainment area, the Outdoor H Pavilion has everything you need to make your vision a reality. So why wait? Upgrade your outdoor living space today with the ultimate in customizable outdoor living - the Outdoor H Pavilion.

Pavilion H

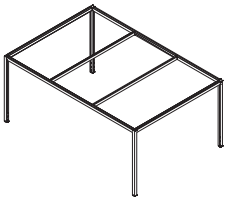

Pavilion H

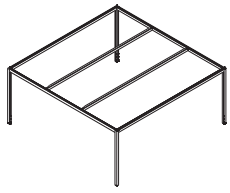

This new series of pavilions brings the system even closer to architecture, as we have developed more tools for its integration in the architectural environment. The system is now able to adapt more efficiently to different uses and environments: landscapes, architecture, urban environment, maritime, mountain, and so on. The architecture now has minimal structure, not only for aesthetic reasons, but also to create open spaces that flow freely into each other by means of light, transparency, and lightness of structure. The H Pavilion is a modular structure that allows for a multitude of configurations, further enhancing its flexibility and adaptability to different environments and needs.

Kode new app

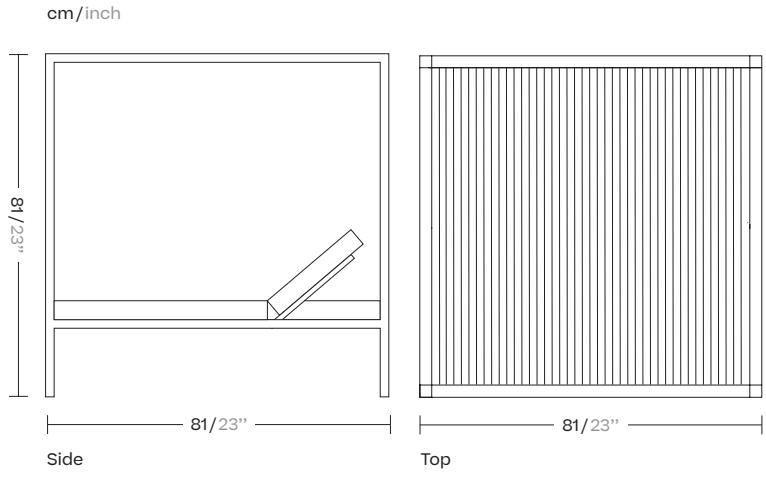

Kode turns your pavilion into a smart home that you can control from miles away or from your sofa: Adjust the ceiling opening, control the lights, temperature and ventilation, and you can even open and close the blinds. Pavilion H is now a connected smart Pavilion.

Kode app was designed with the goal of bringing mobility and intelligence into one parallel action. With it, Kettal's Pavilion H users can now control and master the various functionalities at various distances from their Pavilion H via their cell phones.

Furniture

Versatile and timeless furniture designed by some of the most important names in the international design scene.

The furniture collection, which is suitable for both indoors and outdoors, is lively and expressive.
It features modern classic designs, with an informal and stimulating language, enriched by contemporary colors and materials.

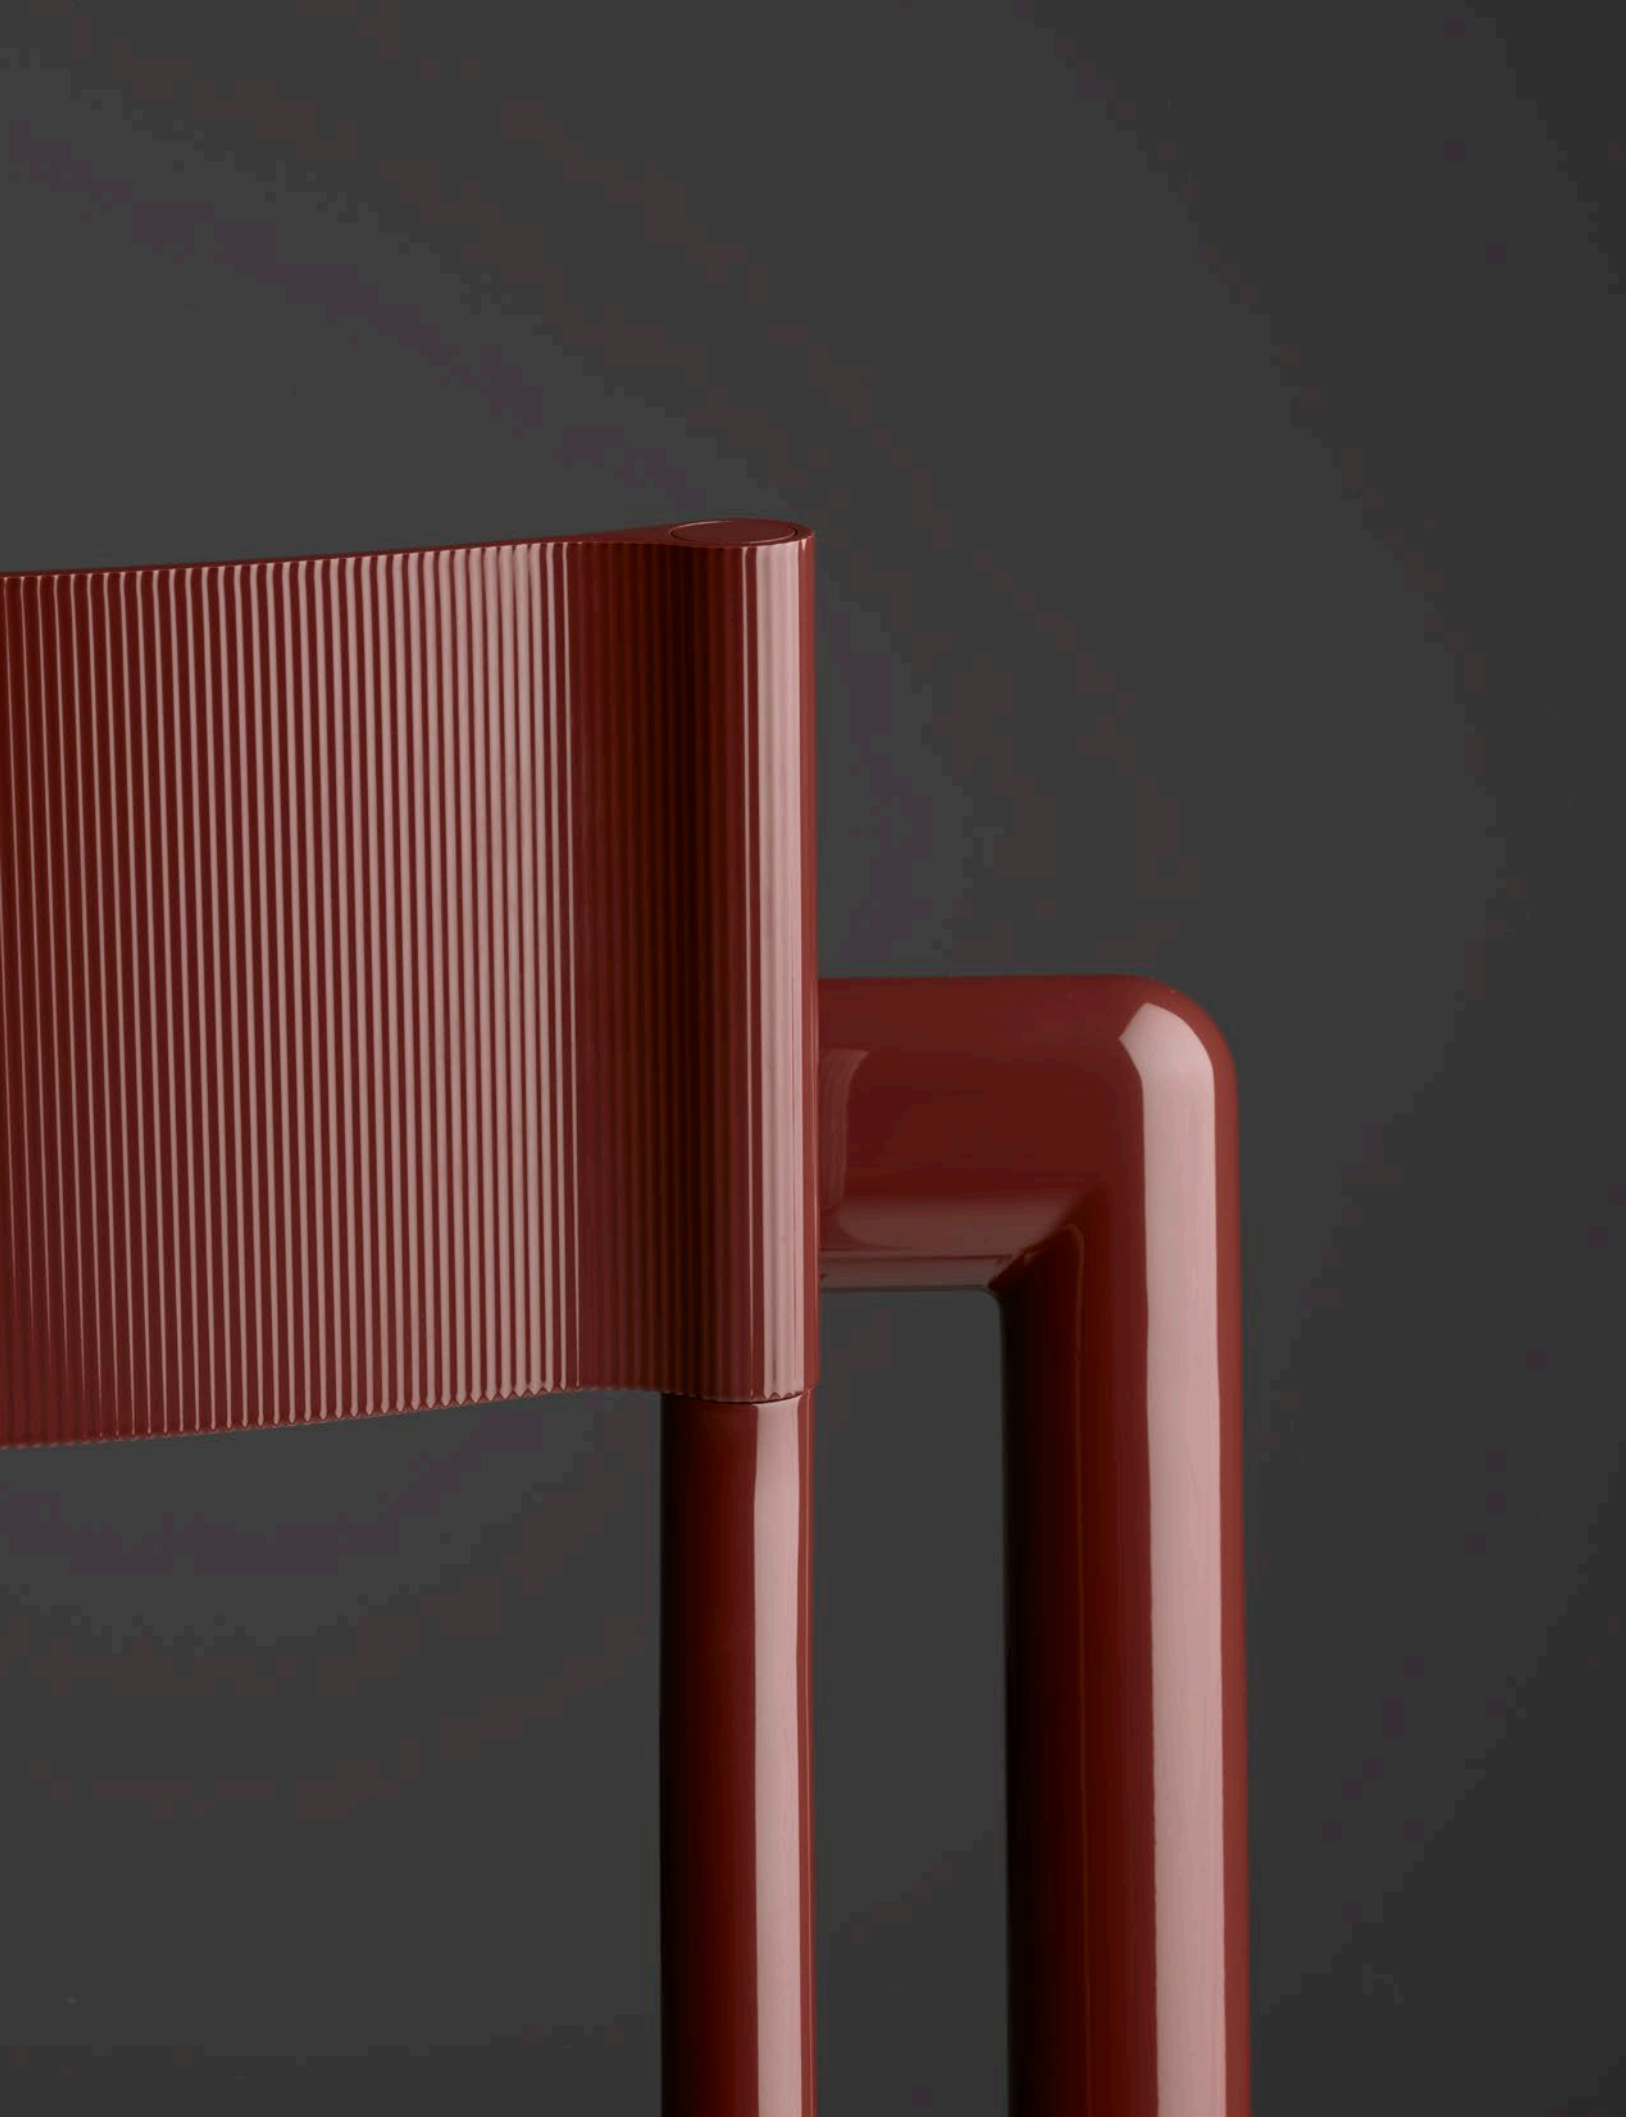

Passage, by Ronan Bouroullec

Passage as a concept is highly ambiguous and versatile and can be used to describe numerous actions and situations. Passage relates to movement, it describes passing or movement from one place to another, in relation to travel, literature or music.

The Passage chair has any number of uses; it can seamlessly pass from one situation to another, from one place to another, from one use to another... It can be placed indoors or outdoors, displayed in a public place or kept in the comfort of home, in an urban environment or in the country.

Passage is made of aluminium, because this light, resistant material best represents the changing nature of the chair. As well as being recycled and recyclable, it is highly durable, whatever its use, which greatly reduces the carbon footprint left by its manufacture.

Two important parts create the PASSAGE aluminium chair's unpretentious structure: firstly, a very simple tubular structure, which then supports the backrest and seat, manufactured as a single piece of extruded aluminium. The lightness and flexibility of the seat finishes give the object its unique capacity for adaptation.

Insula,
by Patricia Urquiola

The Modular Insula sofa is Patricia Urquiola's updated interpretation of traditional seating used in traditional Arab Majlis, where community members gathered to discuss events and local issues, entertain guests, build friendships, and have fun.

Formally, it is a rational modular sofa with very softened shapes and low height, with a Insula in the backrest that concentrates all the protagonism of the design and provides a decidedly horizontal emphasis. It combines carefully balanced proportions as an architectural element that can be subtly integrated.

Functionally, like the original concept of Arab Majlis, the main function of the Insula sofa is socializing. The multitude of configurations allows it to adapt to all kinds of social situations, both indoors and outdoors: from the reception of an office where one can find a place to work relaxed, to resting in a home or outdoors for sunbathing and having fun.
Its modular design consists of an orthogonal aluminum base with very softened shapes where the seat cushion, very plush and comfortable, is located. The two sizes of its seats allow for various types of backrests: individual, double, angular, etc.

Eolias, by Antonio Citterio

Eolias Collection by Antonio Citterio, inspired by the breathtaking archipelago located off the coast of Sicily. This versatile collection includes a range of indoor and outdoor furniture pieces designed to elevate any space.

One of the collection's highlights is the Eolias Salinas series, which features a chair, club chair, and club lounge chair made from sturdy aluminum with a woven wicker detail. These pieces come in both indoor and outdoor versions, with the indoor chairs available with or without wheels for added convenience.

For those seeking a more contemporary look, the Eolias Alicudi chair offers a sleek and modern design with an aluminum frame and slatted detailing.

To complete the collection, there are two sizes of dining tables with a folding option, providing a stylish and functional solution for any dining area.

Giro,
by Vincent Van Duysen

The core idea and insight behind Giro was a different usage of the rope. It is sewn together in order to create the shape of the product itself. A big source of inspiration was the Orkney Chair. This classic inspired Vincent to draw inspiration from the past with an eye on today and Kettal's technological expertise. Originally based on a natural rope material, it has been reinterpreted through the use of the very sustainable polyprollante material which can face all kinds of weather.

Molo,
by Rodolfo Dordoni

This is an example of a modular sofa in its purest form. Its orthogonal geometry is based on a rectangular modularity design, which means it can be easily adapted to suit any situation and optimize the space in which it sits. Each module can be taken apart and re-organized, creating new uses and configurations.

The design is aesthetically minimalistic with intentionally oversized pieces. On the other hand, the decorative elements have been consciously de-emphasized in order to give centre stage to the various combinations of fabric, colours and carefully selected details.

Il Colonnato, by Mario Bellini

In this project, Mario Bellini took his inspiration from a basic elemental structure in architecture. His design emulated the colonnade of classical architecture, in which a sequence of columns supports a portico, in this case a table top.
The base is a visually closed volume, despite being materially open. When seen from a different viewpoint, perception changes completely, as the columns no longer overlap and the space appears empty.

Grand Bitta, by Rodolfo Dordoni

The Grand Bitta collection features a unique combination of aluminum and teak legs, seats made of braided polyester, and comfortable cushions, with teak or stone table tops, all crafted from waterproof materials.
The designer's intention was to create a dense braiding that would allow air to flow through, evocative of the braiding used to moor boats (hence the name "Bitta," which means "mooring" in Italian). The result is a collection of pieces that appear light and airy, while also providing cozy, natural-hued nests to unwind in. Crafted from a blend of ropes, teak, and aluminum, the Daybed is fully customizable with a range of rope and fabric colors to suit your style. Designed with outdoor lounging in mind, the Daybed's generous size and comfortable design make it the perfect addition to any patio or poolside. Enjoy luxurious relaxation in style with the Grand Bitta Daybed.

Bitta & Bitta Lounge, by Rodolfo Dordoni

Grand Bitta is characterized by a combination of aluminum and teak legs, seats of braided polyester and comfortable cushions, with teak or stone table tops - all while using all waterproof materials. “The intention of the designer was to create dense braiding that would still let the air through, reminiscent of the braiding of the ropes used to moor boats (hence the name Bitta, which means ‘mooring’ in Italian), which makes the pieces look lightweight but, at the same time, they look just like cozy nests in natural colors to sit back and relax in.”

Plumon,
by Patricia Urquiola

The new outdoor family designed by Patricia Urquiola for Kettal is based on the concept of clothing, on dressing and undressing furniture.
Adopting a tailoring approach, Patricia Urquiola designs the new family with a reference to the characteristic Brazilian spirit, which lives in abundant, roomy, comfortable furnishings, somehow evocative of distant landscapes and cultures.
For Plumon, Urquiola designs a light structure, on which a tailored and padded dress is 'moored', wrapped. This ribbed padding, characterized by stitching, as well as being an aesthetic figure, fulfills the comfort of the product. It is the fit that guides the aesthetics. With a few simple gestures, the dress is placed on the rigid teak structure and embraces it. An extreme ease of use that becomes a real plus for an outdoor collection.
A comfort that is also emphasized visually, thanks to the padded dress that generously also embraces the armrests and the outside of the backrest.

Boma,
by Rodolfo Dordoni

The Boma collection was born from the need for high performance in outdoor environments, without sacrificing on the increasing demand for comfort.

The structure is organized around a frame entirely made of aluminum, which is capable of hiding in the essentiality of its lines both the quality of the materials used and the possibility of easy articulation in different compositions.

Riva,
by Jasper Morisson

The Riva collection of outdoor furniture is above all about achieving a certain atmosphere for the better enjoyment of outdoor space. The plank construction of seat and back follows a long and varied tradition of outdoor chairs made in similar ways, and which, in this case, actually provides a high level of comfort and good looks too.

Mesh,
by Patricia Urquiola

The Mesh collection recalls architectural facades, which filter the surrounding environment without stopping the light and air flow. Industrial and natural materials, hard and soft surfaces, transparent and solid volumes are put face to face in order to create this family of outdoor furniture based on contrasts.

Cala,
by Doshi Levien

Cala is a high-backed armchair inspired by the iconic Emanuelle. The chair has a majestic spatial presence with transparent and light surfaces. The open weave of the rope provides a latticed window for visual privacy while maintaining a connection to the natural elements.

Cala may be used for outdoor dining as well as a chair to lounge in. The wide selection of metal coatings, rope colours and cushion fabrics offer many possibilities to tailor the identity of the chair to suit different projects.

Band
by Patricia Urquiola

The idea behind the Band collection is the breakdown of structure. It is an object designed using an ensemble of pieces. The chair's design intentionally challenges the classic sophisticated lines of furniture design and becomes something schematic — a conceptual program. It is a structure made up of repetitive angular shapes that give centre stage to its raw materials and it can be formed entirely of aluminum or teak wood, as well as Terrain Fabrics.

Basket,
by Nanna and Jørgen Ditzel

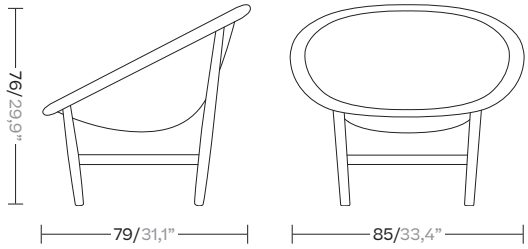

An edit of the Basket chair, created in the 1950s by the Danish designers Nanna and Jørgen Ditzel. The Basket chair, made from oak, comes in its original version created by the Ditzels — hand-braided in wicker — and in an outdoor version made from artificial fiber and teak.

Tou,
by Naoto Fukasawa

Tou is our modest tribute to the ancient handicraft of rattan and reed wickerwork, an essential element in the development of both Western and Eastern cultures. Historically, it has been used for all kinds of domestic utensils, furniture and more. The materials are simple and completely natural, but the internal structure of the stem consists of hundreds of cavities, making it both strong and light.

The manufacture combines traditional manual techniques with much more industrial processes. Instead of using the most common form of weaving, we use striped vertical lines, which are lighter and much more expressive than mesh. The outline is smooth and soft, following the natural shapes provided by the material.

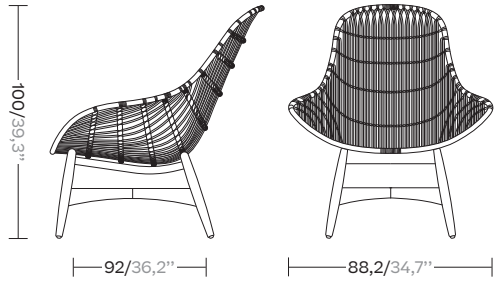

Tou

Arc,
by Kettal studio

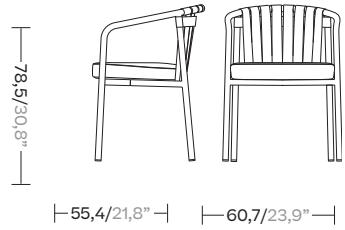

The Arc collection features an enveloping backrest based on fundamental geometry: a constant radius arc. It shows restrained, elegant proportions. The light aluminium frame clearly expresses a desire to maintain armchair tradition.
The backrest features simple yet sophisticated braided strips, while the seat is padded with polyurethane foam covered in matching fabric and the fabric cushion has a removable cover.
The collection is used mostly in hotels, in lobbies and rooms, on cruise ships and also in domestic settings as light furniture in sofa and dining areas.

KSA500200

Altar,
by Miguel Milá

Miguel Milá designed this table in the mid-sixties as an altar for his wedding. It later became a table for everyday use, but was never produced.
As if he were a master craftsman, Miguel Milá designed this piece based on the art of simplicity and efficiency. Its shape hides its complexity, but at the same time reveals the wood's own character, giving it life and prominence.
Its constructive logic makes it strong enough in terms of structure, but formally a beautiful piece.
The beauty of logic and common sense understands neither time nor trend.

Pad,
by Kettal studio

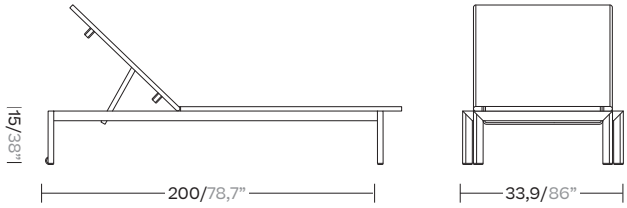

Kettal has made deck chairs for decades, and always of the same excellent quality. This enables us to offer a product that garners all that experience: comfort, durability, stackability and so on.
Pad is a sturdy, long-lasting deck chair system designed for relaxing in comfort. It is built to withstand continued use. The sturdy seat guys and backrest can be easily changed. The ample seat surface and sandwich-style structure make it exceptionally comfortable. With a stretch guy attached to the aluminium frame and optional cushions that add extra comfort.

Deckchair

KSA700100

Ringer,
by Michael Anastassiades

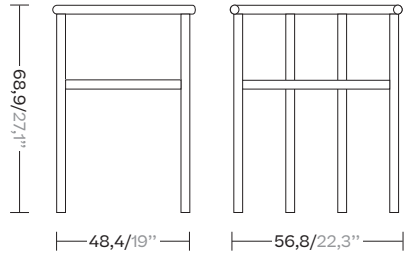

The Ringer Collection is the first collaboration between Kettal and Michael Anastassiades, and it was conceived as a minimalist approach to cafe dining furniture. The title references the traditional Game of Horseshoes, and links to the gesture of the armrest sitting on top of the legs.

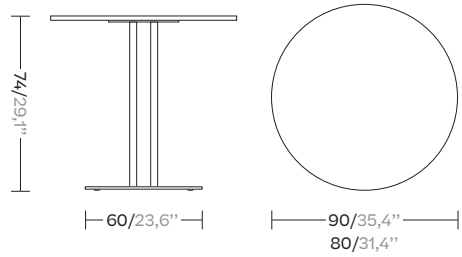

Dining Armchair

Vimini,
by Patricia Urquiola

Vimini means wicker in Italian and it also sounds like Bimini, the name of an island the designer likes. It uses just the right amount of outdoor wicker with a rougher wooden frame. It does not have the same modernist spirit as the Basket (which the original inspiration came from) but it is familiar enough that, when you get close, it stirs a memory and makes one feel at home. That is what it is, more or less — an object of memory.

Maia,
by Patricia Urquiola

Like an architecture that is in keeping with its surroundings, the Mala collection designed has a natural lightness and elegance.
The design of the artisan braiding, the sturdiness of the aluminum frame and the new, Porotex and chenille fabric collection create a combination that oozes energy.

Landscape, by Kettal Studio

Landscape aims to be part of a project.
It is not understood as an item apart, but instead relates to its environment and melds with it.
It is the project that is important, not the product, and this is its essence. Its rationalist construction seeks to bring order, form and structure to the outdoor space.
Functionally, it is designed to provide shelter: to shade and cool or protect from the elements.

Village,
by Jasper Morrison

A chair for all outdoor situations, from village house to grand café. The lightweight aluminium structure allows easy handling while the neutral language of its form takes nothing away from the scenery. This chair pays respect to the long standing codes of metal stacking outdoor chairs while gently refreshing the look.

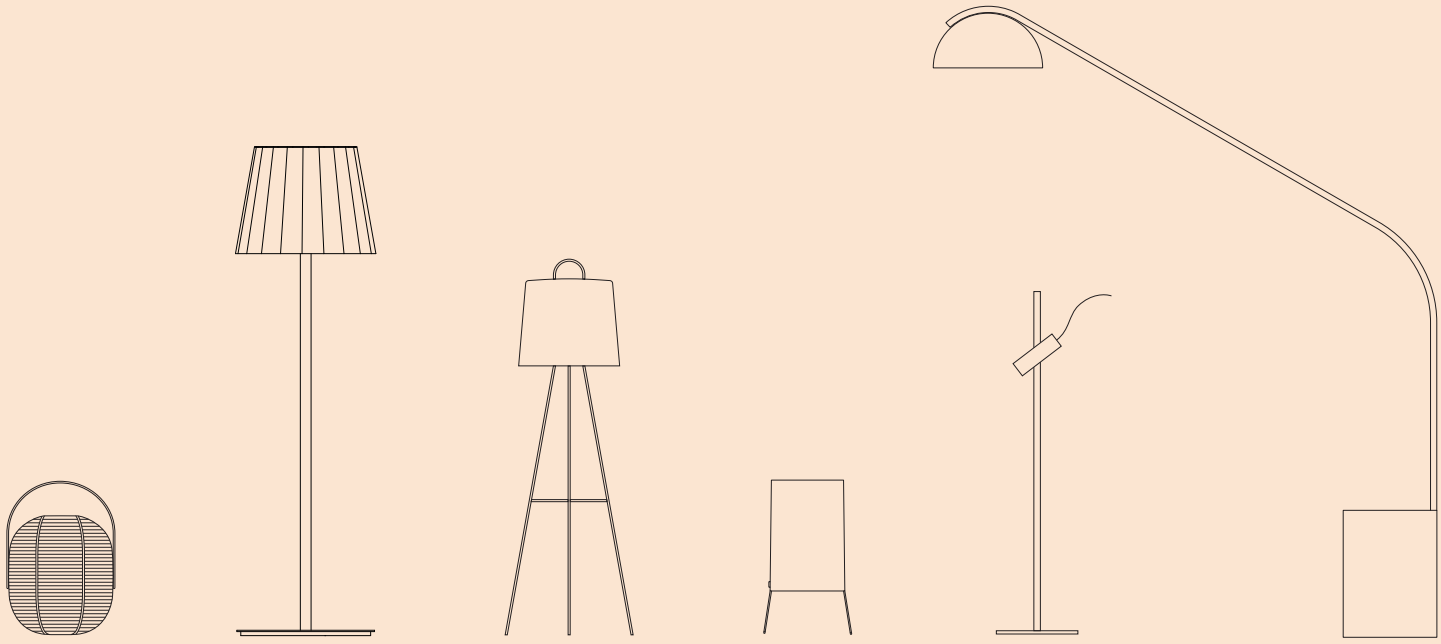

Dining Armchair

KS1300100

Lighting

Elegance and technology meet to improve the lighting of your spaces.

The different light designs can adapt to all situations: conversation, concentration, relaxation and more. We now know that an adequate amount of light and a clever placement improves mood and energy levels. Form, function and performance is driving the fusion of technology and emotion.

Living 2025

Half Dome, by Naoto Fukasawa

Never the same Half Dome, never the same light or the same mood. Half Dome is a great mountain with endless variations of lighting and sky situations and seasonal characteristics; the many images reflect the varied creative responses to this remarkable granite monolith. The dimension of Half Dome light follows our image of the moonlight.

Bela lamp, by Doshi Levien

Bela is a colorful and versatile lamp with a continuous length of rope in a form referencing the texture and lightness of traditional handwoven lanterns. Every year in India there is a kite festival and the streets are lined with enormous spinning frames wound with colourful kite string. These light wooden structures gave Doshi Levien the idea for the frames or spools onto which the Bela ropes are clipped. It can be placed directly on the floor, suspended or used as a standing lamp.

Dots,
by Kettal Studio

Dots lamps, manufactured in aluminium with LED lights, are available in two versions: floor lamp with a circular base and planter lamp with a base that can be fastened to the ground. The new Dots lamps have been developed for indoor and outdoor use. The height and direction can be adjusted to focus the light where it is needed. The lamp features a waterproof switch and includes a USA plug.

Mia,
by Michel Charlot

Mia is a family of nomadic lamps built around an acid-treated glass diffuser which is protected by a large polypropylene lampshade. Both are held in place by a clever wire structure. It was important to have the lamps completely waterproof. By achieving this, the Mia allows for a wide range of applications and it is suitable for outdoor use. The Mia series comprises multiple variations, including a small battery powered lamp.

Shadow

Selectively shade your outdoor spaces.

The humble parasol has a vital role to play in maximizing your enjoyment of outdoor spaces. It ushers away the harsh sunlight and it should be an unassuming but elegant presence on the patio.

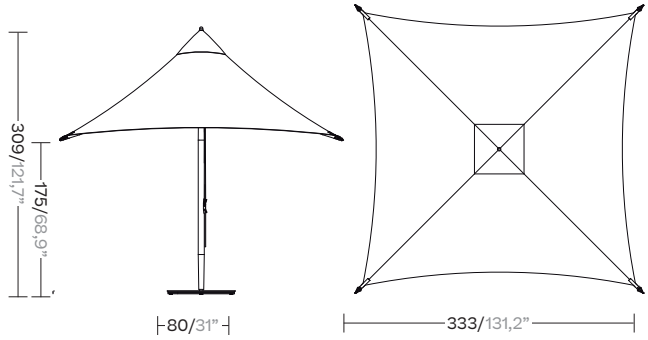

kettal

Paladin,
by Konstantin Grcic

Paladin is a wooden parasol for domestic and public use. Its canopy appears to be floating on top of an elegantly shaped mast. The design employs a mechanical principle which incorporates the tension of the canopy into its structural logic. With only the mast and four movable struts, the textile absorbs the tensile forces of the parasol when unfolded.
The mast goes right through the center of the canopy, leaving a central hole that is acting as an indirect skylight and allowing for air circulation.
The wooden elements are made in natural teak with a reinforcing core in aluminium. The mechanical joints and fasteners in aluminium and stainless steel are designed to minimize the material input while offering maximum performance.

Paladin

Objects

Offering additional options while complementing the collections.

A selection of objects that complement indoor and outdoor spaces. They will dovetail aesthetically and functionally with your overall project.

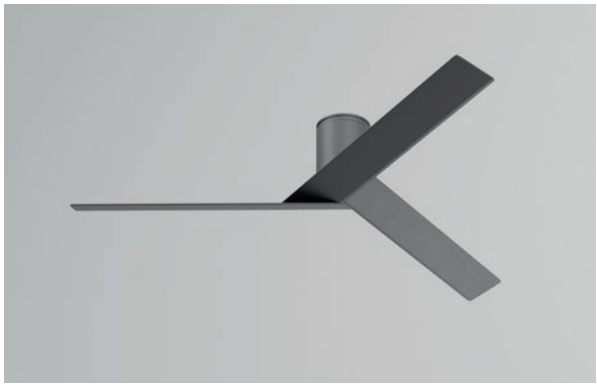

Superfan
by Michael Anastassiades

Superfan is a tri-blade fan whose geometry is simply defined through three angled blades, meeting at the rotating axis. All design decisions are made to maximise performance and improve efficiency: the angle of the blades, the lightness of the aluminium material and the selection of the motor for accurate speed control and quiet function.

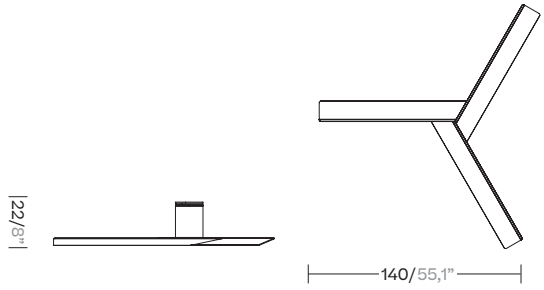

The two fan versions operate with equal efficiency both with and without a pendant, offering flexibility of use for different ceiling heights.

Base Kitchen by Kettal Studio

This modular kitchen structure offers infinite solutions. An aluminium supporting frame can be teamed with a number of stoneware modules in various combinations whilst maintaining its authentic linear design.
This design features clean, smooth surfaces, with no corners, for easy cleaning and maintenance.

It is available in two types of stoneware and two Iroko wood finishes for the doors. The modular aluminium structure comes in black only.
Along with basic kitchen functions, it has a gas barbecue and can include several burners with a support for a wok. It can also include a bar.

Waranty terms

For domestic use, all products, except for cushions, covers and fabrics (including textilines), are guaranteed for a period of five years against any manufacturing defect that affects their suitability for use. This applies to normal conditions of use and maintenance. This guarantee does not apply to faults or imperfections resulting from the passage of time or normal wear and tear. Circumstances not covered by this guarantee include, but are not limited to, the fading or change in shade of colours, changes in wood texture, scratches resulting from use, etc. For non-domestic use, by the hotel and catering industry and collectives for example, all products, except cushions, covers and fabrics, are guaranteed for a period of two years. This guarantee is subject to the same conditions as outlined above.

Technical specifications

Committed to innovation and quality, Kettal's collections are manufactured to the strictest quality standards, from the selection of the materials, to the quality and safety testing of the furniture.

IMO Certification

Upon request, we can certify our products under the IMO standards.
